DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

2. Claims 7-22 and 53-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following terms have no proper antecedent basis: "the surface card" (claim 7, line 6; claim 15, line 9); "the downhole card" (claim 7, lines 6-7; claim 15, line 9); "the steps (A), (B), (C), (D), and (F)" (claim 22, lines 3-4); "said software" (claim 53, lines 1-2)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-22 and 39-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vazquez et al (US 6,343,656) in view of McCoy et al (US 5,464,058).

Vazquez et al disclose the invention as claimed (see Paragraph No. 5 in last Office action) except that Vazquez et al do not provide a viewable graphical representation of the downhole card or/and surface card. However, it would have been obvious to one of ordinary skill

Art Unit: 3672

in the art at the time the invention was made to display the downhole card or/and surface card as claimed because McCoy et al teach displaying the card(s) so that an operator can visually analyze the downhole pump operation (see column 2, lines 54-62 and column 14, lines 12-19).

Response to Arguments

5. Applicant's arguments with respect to claims 1-22 and 39-61 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references further show that it is well known in the art to display the data regarding a downhole pump operation on a screen so that abnormalities can be readily determined.
